A decorative graphic on the left side of the page features a large green tea leaf at the top, followed by a green teapot icon, and a cluster of green tea leaves and dried tea leaves at the bottom.

**"CUPINLT"** is a paper cup manufacturing company. We offer a new, unique product for the Lithuanian market.

**"Tea in a paper cup"**, an individual-use product that combines a tea bag and a paper cup. A certain amount of tea is packaged in a paper cup, after which a membrane is attached 1 centimeter from the bottom of the cup.

The membrane, made of the same material used for tea bags, holds the tea at the bottom of the cup.

The amount of tea is such that it imparts the flavor characteristics for the first 2-3 minutes of brewing and does not affect the strength of the beverage after that.

The membrane at the bottom of the paper cup does not interfere with the addition of sugar, as it becomes elastic after 2-3 minutes in hot water.

Cooking speed
